DBP SERIES HYDRAULIC COUPLINGS

Designed for the speedy and efficient connection of hydraulic hoses where equipment is interchanged, Hydreco quick release couplings offer the best solution for the transport industry.

Available in sizes from 1/4" to 1", Hydreco quick release couplings provide self sealing hose ends or pressure eliminator options to prevent oil loss and ease of engagement.

Also available in ISO standard flat face configurations as well.

Product Features

- **High Pressure Capacity**
Compatible with all truck applications.
- **Low Pressure Drop**
Optimum power transmission and less heat generation.
- **Safety Lock Ring**
Prevents unintentional disconnection.
- **Pressure Eliminator**
Relieves any pressure built up in lines (due to Heat) for easy re-connection of coupling.
- **Double 'O' Ring Seal**
Provides leak proof seal at high pressures.
